DETAILED ACTION

Allowable Subject Matter

1. Claims 1-10 are allowed.
2. The following is an examiner's statement of reasons for allowance: with respect to claims 1 & 3, in addition to the limitations in the claims, the prior art fails to teach or discloses the applicant's inventions as claimed, particularly the feature describing a switch coupled to a low voltage power supply, an input, the output, and the intermediate node; and a switch coupled to the input, the intermediate node, the output, and ground.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kihara et al (6,781,413) discloses a level conversion circuit having either a pull-up circuit or pull down circuit connected to the intermediate node, input, and output; but not both circuits and the pull-up circuit doesn't connect to low voltage power supply.
